MURALPLAST M-GUARD

Preservative/Decorative Treatments
For All Building Surfaces

10 Year Guarantee
backed by AXA insurance

Muralplast M-Guard

Total Protection for Porous and Non-Porous Building Surfaces Including Timber

The **Muralplast M-Guard** range of water-borne, acrylic copolymer-based surface treatments provides total protection to virtually all building surfaces. They are not paints but preservatives fully adapted to the particular requirements of building surfaces. They not only enhance surface appearance but provide protect from weather, pollution and vandalism, extending life and reducing maintenance cycles. **M-Guard** benefits and features include:

Durability

- Long life expectancy - with 10-year AXA insurance-backed guarantees
- Resistance to UV radiation, does not discolour
- Resistance to water penetration, grease-based dirt and graffiti
- Suitability for internal and external application
- Scratch and abrasion resistance
- Non film-forming allowing the surface to breathe
- Prevention of deterioration from freeze-thaw cycling
- Makes cleaning easier
- Reduces maintenance cycles
- Solvent and silicone free
Non-hazardous and non-toxic

Products

M-Guard Facade

Total protection of porous building surfaces such as natural stone, concrete, terracotta, cement and self-locking paving. Limits the formation of efflorescence and the growth of moss and lichen. Can be applied to external and internal horizontal and vertical surfaces. Meets Class 1 Surface Spread of Flame BS 476 Part 7.

Appearance - Invisible once dry. Does not discolour with age.

M-Guard Colour

Treatment that is fully adapted to use on concrete (even high alkaline fresh concrete or mineral rendering).

Appearance - It is semi-transparent when applied and retains the texture and appearance of the mineral material it is protecting. It is available in a range of 42 colours or any shade to order.

M-Guard HD

All-round protection of all low porosity or relatively non-porous building materials. Can be used internally and externally on walls, floors and roofs and is particularly suited to surfaces subject to high use such as pavements, pedestrian precincts, patios, swimming pool decks, stairways and car parking areas.

Appearance - Totally colourless after application and changes neither the appearance nor the composition of the treated material. Does not discolour with age.

M-Guard HD Plus

Protection of all porous building materials, particularly those used for flooring. It is suitable for both internal and external floorings such as natural stone, concrete, terracotta, cement and self-locking paving. Leaves the surface permeable to both air and water.

Appearance - Provides a gloss/satin 'wet look' that enhances the colour of the surface.

M-Guard Timber

The next generation of treatments for the protection of untreated timber and restored wood. It is not a coating but a decorative formulation that penetrates the wood fibres making them completely waterproof and stain resistant without affecting the natural structure and graining. Exceptional resistance to all weather conditions and UV rays makes it suitable for use on external cladding, gates, blinds, panelling and garden furniture.

Appearance - Available in 15 standard colours and 2200 RAL Design colours. Preserves the natural graining.

M-Guard Timber Plus

As **M-Guard Timber** but specially formulated for use on decking, wood floors and any horizontal surface. Slip-resistant, it also has high resistance to abrasion and scratches and provides protection against UV radiation and decay. It restricts the growth of moss and lichen. Treated timber remains breathable.

Appearance - Available in 15 standard colours and 2200 RAL Design colours. Preserves the natural graining.
